

Merryn

## Camel

Camels are adapted to the desert because they have big feet so they don't sink in the sand. Also camels have humps to store ~~water~~ water fat with ~~transfers~~ in to water. Camels have long eyelashes to keep sun out of there eyes

## polar bears

Like camels polar bears have big feet to stop them sinking in to the snow. They also have thick fur to keep warm. Also they have thick claws to attack there prey. Polar bears are white to camouflaged in to snow. They have fat inside them to also keep warm
